

Carbon Reduction Plan

Supplier name:Datactics Limited

Publication date: ...8th December 2021

Commitment to achieving Net Zero

Datactics is committed to achieving Net Zero emissions by 2035.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations.	
Datactics is an SME without previous emissions reporting. As this is the first year reporting emissions for Datactics we lack previous baseline reporting and current report will be used as baseline. Datactics does not control any sources that emit greenhouse gas emissions relevant to Scope 1. The calculations for Scope 2 is an aggregate of the electricity purchase for the 3 office units that Datactics operate, all of which use electricity also for cooling and heating. This aggregate is from January – November with an average emissions rate added for December. Scope 3 is composed employee commuting and business travel as Datactics does not operate any supply chains.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0
Scope 2	22.4 tCO₂e
Scope 3 (Included Sources)	19.2 tCO₂e
Total Emissions	41.7 tCO₂e

Current Emissions Reporting

Reporting Year: 2021	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0
Scope 2	22.4 tCO ₂ e
Scope 3 (Included Sources)	19.3 tCO ₂ e
Total Emissions	41.7 tCO₂e

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **35 tCO₂e** by **2026**. This is a reduction of **16%**.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline.

- Datactics has implemented a hybrid working model which will reduce commuting and office consumption of electricity
- Cycle to work scheme

In the future we hope to implement further measures such as:

Datactics is consolidating the 3 office units operated into 1 in 2022 which will create a more effective usage of electricity and lower emissions.

A range of measures is being considered, such as –

- Low energy lighting
- Power & AC management policies
- Alternative sources of energy

Datactics as an organisation is planning to be actively engaged in sustainability efforts over the next year which are planned to begin offsetting our emissions.

Declaration and Sign Off

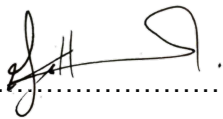

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
