

# Carbon Reduction Plan Template

Supplier name: Datactics Limited

Publication date: 16/05/2023

## Commitment to achieving Net Zero

Datactics is committed to achieving Net Zero emissions by **2035**

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

**Baseline Year: 2022**

### Additional Details relating to the Baseline Emissions calculations.

Datactics began measuring our Carbon Emissions last in 2021, however 2021 was an exceptional year during the global pandemic where a lot of Datactics staff were working from home and little to none business travel took place. Therefore it is not representative of business as usual and does not serve as a relevant baseline reporting year, we have decided to use 2022 as our baseline and measure our reduction in carbon emission against this year to get an accurate picture of the impact of our carbon reduction initiatives.

### Scope 1

Datactics does not control any sources that emit greenhouse gas emissions relevant to Scope 1.

### Scope 2

The calculations for Scope 2 is an aggregate of the electricity purchase for the office unit that Datactics operate which uses electricity also for cooling and heating.

### Scope 3

Scope 3 is composed of employee commuting and business travel as Datactics does not operate any supply chains.

**Baseline year emissions:**

EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	0
Scope 2	15.5
Scope 3 (Included Sources)	58.8
<b>Total Emissions</b>	<b>74.3</b>

## Current Emissions Reporting

Reporting Year: 2022	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	0
Scope 2	15.5
Scope 3 (Included Sources)	58.8
<b>Total Emissions</b>	<b>74.3</b>

## Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease to **62.4** tCO<sub>2</sub>e by **2027**. This is a reduction of **16%**

In addition to this reduction in emissions, Datactics plans to offset our carbon emissions entirely by 2027

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2022 baseline.

- Datactics has implemented a hybrid working model which will reduce commuting and office consumption of electricity
- Cycle to work scheme
- Public Transport Funding Relief
- Recycling Cardboard, Paper, Plastic, Tin, Glass
- Set up a sustainability committee with representation from across the business that pioneers sustainability initiatives for the staff and business to participate in.

In the future we hope to implement further measures such as:

- Food waste caddy
- Fundraising for local environmental charities
- Green Points Incentives for staff
- Carbon offsetting

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in
